

pma capital solutions

We work with large institutions and investors to help them place capital in Canadian and American development projects through investment via acquisition. Our team helps global investors gain insights into the Canadian and American marketplaces, trends and local nuances. We can assist your team in cross-border acquisitions through our global partnerships that bring Canadian and American opportunities and investors together. PMA's International affiliation and connectivity to the UK, Europe, India, Hong Kong and now the United States provides access for your project to a broad outreach of International investors.

PMA Research, a division of PMA Brethour Realty Group, can provide market analytics, land evaluation and market differentiation for most Canadian cities and through our affiliations can support your research needs in the United States, as needed.

BULK CONDO DEALS™

PMA Brethour Realty Group is the official Canadian partner of Bulk Condo Deals offering your project sophisticated and professional exposure to the United States, Canadian and International Investor.

Bulk Condo Deals is a global marketplace for developers, financial institutions and other sellers to confidentially post bulk unit condo investments to a global audience of institutional and private investors.

All international, US, and Canadian Listings that appear on the Bulk Condo Deals web site are strategically protected by an NDA, a Non-Disclosure Agreement. In fact, a potential investor cannot access project listing details without first signing the NDA. This process maintains a significant level of privacy and protection to each project listing and allows the retail offering to continue in the public domain and completely independent of the Bulk Condo Deals opportunity. All investor enquiries will be first vetted by the Bulk Condo Deals Team. The NDA assures that private and sensitive project specific information is kept completely confidential.
